

The Dual Master's Degree Program with ENSEEIHT

You can complete your second Master's degree at Ecole Nationale Supérieure Electronique Electrotechnique Informatique Hydraulique Telecommunications, ENSEEIHT in the areas of Hydraulics, Fluid Dynamics, Energetics and Transfers, Fluid Engineering. Detailed information about the Master's programs at ENSEEIHT can be found on their website at <http://www.enseeiht.fr/en/courses-and-admissions.html>.

The dual degree is organized as follows:

- Fall and Spring is spent at GT Lorraine, where you will take 8 courses (24 credit hours). Application to the Master program is complete over the Spring semester.
- On a case by case basis, you may intern in industry (depending on available opportunities and profiles)
- In the following Fall term, join ENSEEIHT to complete your Master's degree from Europe, and transfer 2 of those courses to GT to complete your MSME requirement. The European Master's degree courses are offered in English or in French.
